Dilar Idris Almaao

Full-Stack web Developer (.NET Core / Laravel && Reactjs)

Mobile: +963983596764 | **Address:** Syria, Damascus

dilaralmio@gmail.com | GitHub | LinkedIn |Portfolio

Professional Summary

Full Stack Developer with hands-on experience building web applications using ASP.NET Core, React, EF Core, SQL Server, and Docker. Skilled in developing RESTful APIs, responsive user interfaces, secure authentication and authorization, and relational database solutions. Strong foundation in clean code, SOLID principles, and maintainable application architecture.

Technical Skills

Languages: C#, JavaScript, PHP, SQL, T-SQL
Back-End: ASP.NET Core Web API, Entity Framework Core, Laravel, ADO.NET, RESTful APIs, LINQ
Front-End: React, HTML, CSS, Tailwind CSS, Bootstrap, Laravel Blade
Databases: SQL Server, MySQL, Relational Database Design
Authentication, Security & Validation: JWT Authentication, Refresh Tokens, Role-Based Authorization, FluentValidation, Rate Limiting, CORS, HTTPS, Logging & Auditing
Software Engineering: OOP, SOLID Principles, Dependency Injection, Layered Architecture, MVC, Repository Pattern
DevOps & Tools: Docker, Docker Compose, Git, GitHub, Swagger/OpenAPI, Postman

Technical projects

- **University Management System | ASP.NET Core + React** Github Link
  Developed a full-stack university management system using ASP.NET Core 8, React, and SQLServer supporting role-based workflows for administrators, instructors, and students across courses, offerings, enrollments, and academic assessments.
  Implemented JWT authentication with refresh tokens, role-based authorization, FluentValidation, rate limiting, pagination, transactional operations, and academic business rules.
  Containerized the React frontend, ASP.NET Core API, and SQL Server using Docker and Docker compose
  Technologies: C#,ASP.NET Core Web API, React, JavaScript, EF Core, SQL Server, JWT, FluentValidation, Axios, Tailwind CSS, Swagger, Docker, Docker Compose

- **Hospital Management System** Github Link
  Designed and developed a scalable hospital management system using Laravel, applying repository-based architecture, dependency injection, and modular design principles to improve maintainability and extensibility. Implemented role-based workflows, multilingual support, and integrated billing and financial management across multiple hospital departments.
  Technologies: Laravel, Livewire, Blade, Eloquent ORM, MySQL, MVC, Repository Pattern,Dependency Injection

- **Driving &Vehicle License Department** Github Link
  Designed and developed a layered desktop application for managing driving license department operations using C# and WinForms. Implemented end-to-end licensing workflows, including license issuance, renewal, replacement, detention, and driving test management, supported by a dedicated business layer and ADO.NET data access architecture.
  Technologies: C#, .NET Framework 4.8, Windows Forms (Win Forms), ADO.NET, SQL Server, SQL, Layered Architecture

Education & courses

- **B.Sc. in Information Engineering Syrian Private University** (2020 – 2025)

- **Programming Advices Roadmap** – 24 courses covering SQL, C#, .NET Framework, Data Structures, Win Forms, T-SQL, REST APIs, and Problem Solving (2023 – 2025)

Language

Arabic: Native |English: Very Good | Deutsch: B1 OSD
