Professional Summary

Backend Developer with hands-on experience building secure and scalable applications using ASP.NET Core, Laravel, EF Core, SQL Server, and MySQL. Skilled in designing RESTful APIs, implementing authentication and authorization, and developing maintainable backend systems with a strong focus on clean code, database design, and software engineering best practices. Passionate about continuous learning and delivering reliable, high-quality solutions.

Technical Skills

Frameworks: ASP.NET Core Web API, Laravel, EF Core, Win Forms, ADO.NET

Databases: SQL Server, MySQL, T-SQL, SQL, Database Design

Back-end: RESTful APIs, JWT Authentication, Refresh Tokens, Role-Based Authorization, FluentValidation, Rate Limiting, HTTPS and CORS, Logging and Auditing, LINQ

Front-End: HTML, CSS, Bootstrap, JavaScript, Laravel Blade

Software Engineering: OOP, SOLID Principles, Dependency Injection, Layered Architecture, MVC

Tools: Git, GitHub, Swagger, Postman, Visual Studio, Visual Studio Code

Technical projects

- **Institute Management System API** [Github Link](#)

Designed and developed a secure RESTful Institute management API using ASP.NET Core 8, implementing JWT authentication with refresh tokens, role-based authorization, and rate limiting. Built a transactional management system supporting users, courses, enrollments, and student assessments using Entity Framework Core and a scalable service-oriented architecture.

Technologies: C#, .NET 8, ASP.NET Core Web API, EF Core, SQL Server, JWT, Refresh Tokens, Fluent Validation, Swagger, Rate Limiting, Dependency Injection, RESTful API

- **Hospital Management System** [Github Link](#)

Designed and developed a scalable hospital management system using Laravel, applying repository-based architecture, dependency injection, and modular design principles to improve maintainability and extensibility. Implemented role-based workflows, multilingual support, and integrated billing and financial management across multiple hospital departments.

Technologies: Laravel, Livewire, Blade, Eloquent ORM, MySQL, MVC, Repository Pattern, Dependency Injection

- **Driving & Vehicle License Department** [Github Link](#)

Designed and developed a layered desktop application for managing driving license department operations using C# and WinForms. Implemented end-to-end licensing workflows, including license issuance, renewal, replacement, detention, and driving test management, supported by a dedicated business layer and ADO.NET data access architecture.

Technologies: C#, .NET Framework 4.8, Windows Forms (Win Forms), ADO.NET, SQL Server, SQL, Layered Architecture

- **Company Service and Billing Platform** [Github Link](#)

Developed a Laravel-based business management platform with an authenticated admin dashboard, financial ledger management, PDF reporting, secure file handling, and transactional data processing.

Technologies: PHP 8.2, Laravel 12, MySQL, Blade, Laravel Breeze, jsPDF, Database Transactions, Git

Education & courses

- **B.Sc. in Information Engineering Syrian Private University** (2020 – 2025)

- **Programming Advices Roadmap** – 24 courses covering SQL, C#, .NET Framework, Data Structures, Win Forms, T-SQL, REST APIs, and Problem Solving (2023 – 2025)

Language

Arabic: Native | English: Very Good | Deutsch: B1 OSD
